

Agility Radar

Online tool for analyzing the agility maturity level

Point B Consulting & Advisory

Agility Radar makes the agile change in your company measurable

- Agility Radar is a **flexible online tool** for **determining and analyzing** the agility maturity level of companies

Findings:

- Transparency about **(local) strengths and bottlenecks** for agile work and an agile culture
- **Targeted levers** to optimize system balance and agile performance levels
- Orientation framework and **management indicators** for the systematic and holistic development of an agility mission

Point B accompanies the deployment of the Agility Radar and supports the analysis of results

Preparation

- Workshop with the transformation leaders
 - Discussion of objectives of becoming agile, experienced bottlenecks and possible company-specific knowledge interests
 - Definition of the survey parameters
 - Preparation of announcement communication for the Agility Radar

Deployment

- Online survey of a defined sample or complete survey
- Regular updates of the transformation managers on participation rates and trends based on the interactive dashboard

Analysis

- Provision of a detailed result report
- Joint workshop with Point B to define fields of action and derive initial recommendations for further action

We are looking forward to meeting you!
